Globeform's Weekend Ratings Service

2018

EXPLANATORY NOTES

Rank (ranking): Horse best in at the weights (compared to Globeform ratings) is top ranked with rank figure "0" (zero), and all others ranked down in pounds (lbs), i.e. "3" rank means that the horse is 3 pounds worse off than the top ranked horse. The higher the 'rank figure' the worse off the horse is in this race - based on previous form.

Rank past 3 runs: How the horse would be ranked in this race based on his three most recent runs (from left to right). For example: "0 - 4 - 7" would tell us that the horse is top ranked and ran to his best GF rating three starts back ("0") but ran 4lbs below that form on his penultimate race and 7lbs below on his most recent start. This column shows whether the horse is consistent, whether the horse has good recent form, and whether the horse has been progressing / regressing in his most recent races. "X" = ran too badly to get a rating.

Globeform (GF): The horse's best Globeform rating. In cases where it is relevant two GF ratings may be given (i.e. 119 / 114) and this means that the horse has run to GF 119 in the past but it's a long time ago, and the best rating in his more recent form is GF 114.

Overweights: Globeform ratings are expressed in pounds (lbs). Globeform rankings are based on Globeform ratings compared to riding weights. In cases of overweight, add the overweight from the Globeform rank figure. For example; The Big Horse has ranking figure "2", telling us that he is ranked 2lbs below the top ranked horse - but when changes are announced The Big Horse is set to carry 2lbs overweight. His new GF rank figure becomes "4" (2+2).

Globeform Rating codes

p = improvement expected

P = significant improvement expected

+ = improvement expected from this run, but the horse had already run to a higher rating in the past.

? = provisional rating or uncertain form

* = best GF rating was achieved over today's distance & surface
